Johnson. 1611.

A Prognostication for
this yeare of our Lord and
Saviour Iesus Christ.
M. DC. XI.

Being the third after the Leape yeare.

Written most especially for the Meridian of
the most famous Towne of Colchester
in Essex. and will serue generally
for all England.

Pennd and published by Iohn Johnson
of Thorpe in Essex neere Colchester:
Student in the Mathematickes,
and practitioner in
Physicke.

Imprinted at London for the
Company of Stationers.

1611.

A Description of the foure Quarters of this yeare of our Lord God. 1611.

Of Winter. ☉. in ♍. m. x.

Winter (according to our English account) began the 21. day of December in the yeare past 1610. at 1. of the clocke and xl. minutes at night: at what time the Sunne entered the first minute of the celestiall Signe Capricornus, making the longest day and shortest night in the yeare: Which Quarter is naturally cold and moyst. When the Sunne is in Capricorne, cold raigbeth more then moysture: and in Aquarius it is equally, cold and moyst. The Sunne being in Pices, it is more moyst then cold: and for the most part small store of wind is stirring, especially in the middelt of Winter. The diseases subject to this Quarter, are cold flegmaticke and melancholy Diseases, Scabbies, Tetters, and Diseases in the Feete, quotidian Fevers, and Coughes: and some great likelihood of diseases among Women. This season is like to prove very cold, intermixed with many sodaine stormes of wind and raine.

Of the Spring. ☉. in ♈. m. ii.

The Spring (according to our Astroномicall account) beginneth this yeare vpon the 1. day of March at night, when the Sunne entereth the first minute of Aries, making the Aernall Equinoctiall, the dayes and nightes of equall length throughout the whole world: And in generall is of nature hott and moyst, but very vnconstant: as sometime rayne, sometime hot, and sometime cold. The cold of Winter is now diminished, and the pores of the earth which haue been long shut up and bound with cold, are now loosened, by reason of the Sunne approaching towardes our Aerticall Circle: and moysture often falleth, by reason of the merchenesse of Winter. In the beginning the Sunne being in Aries, the weather inclineth more to moysture then to heate: and in the middle, the Sunne being in Taurus, it is equall for heate and moysture: as sometimes hott & sometimes shewery: And in the end of this Quarter, the Sunne being in Gemini, it is more hott then moyst. In this Quarter vnnally there are many sodaine stormes of wind by reason of the meane temperature of aye. This Quarter there are like to raigne many sharpe Dis-

A Prognostication.

rales, proceeding of Cholley and Blood: Many burning Disrales, as tertian Feuers, corruption of Blood, much Head ach, Frensie, and many iordaine deathes, and Disrales especially in the head, face, and eyes: as Tooth-ach, Rheumes, and Puslules, & Allers proceeding of hote and dry causes. This Season is like to psonne somewhat colder then vsually it is, and great vehement Windes; especially about the latter end of Hatch, and the beginning of Aprill.

Forasmuch as I am intended and purposed to set foorth a Treatise of Astronomickall Arithmaticke in our English tongue, shewing the forme and manner, of calculating the course of the Celestiall bodyes; I haue thought it meete here in this place, to adde the manner & forme of calculating the course of the Sunne, for the Meridian of the tenth of March, this present yeare 1611. And also to finde the true Equinoctiall, or the Houre and Minute of the Sunnes ingresse or entraunce into the first minute of *Aries*. Wherevnto I haue added the Celestiall Figure, not intending to instruct or teach the Learned, but rather to giue a light to those which are students in this Art, and haue not seene the forme of calculating.

Signes, Degrees, Minuts, Seconds.				The calculation of the Sunne 10. March at high noone.

11.	28.	57.	49.	The true place of the Summe frō the Eternall Equinoctiall.
		38.	30.	The Equation of the difference of the Calculations of Magnus, and the late Observations of the famous astro- nomicke Ticho. Brahe, by reason of the precession of the Equinoctiall, and Eccentricity of the Summe not truly found out, is 38. 30. to be added to the place of the Summe first found: and so there ariseth.
S.	Gr.	i.	ij.	
11.	29.	36.	19.	The true place of the Summe 10. March at noone.
The dayly motion. 59. 27.				The diary or dayly motion of the Summe is
00.	00.	00.	γ.	The Summes entrance into Aries is 9. ho. 40. min. at night 10. March.

A Prognostication.

Heere followeth the Cælestiall Figure of the
Sunnnes entraunce into the Vernall Equi-
noctiall, or first minute of *Aries*, the 10.

of March 1611. at Nine of the clocke
and 40. minutes at night.

Johnson. 1611.

Of Sommer. ☉. in ♋. 12.

Sommer beginneth this yeare the xii. of June at iii. of the clocke and xx. min. in the morning; at what time the Sunne entreceth the first min. of Cancer, and smiteth his greatest North declination, making the longest day, and shortest night in the yeare: Which Quarter according to his naturall disposition, is hot and dry. In the beginning (the Sunne being in Cancer) heate ruleth more then drynesse: and in the middle (the Sunne being in Leo) it is equall for heate and drynesse: and in the latter end, (whylest the Sunne passeth through Virgo,) it is more dry then hot. And for the most part, there are small store of Winds stirring this Quarter; especially in the midst of Sommer. The Diseases like to afflict mens bodies are these, or such like; hotte burning Agues, Flures, burning Scabs and Pustules: diseases in the Eyes, and loosenesse of the Belly. This Quarter is like to prove windy at the first entraiunce, and somewhat colder then ordinarie, with moderate showers of raine.

Of Haruest. ☉. in ♎. 14.

Haruest or Autumne, being our last Astronomickall Quarter of this yeare, beginneth at the entraiunce of the Sunne into the first min. of Libra making the dayes and nights of equall length; which hapneth the xii. day of September at v. of the clocke and xx. min. in the after noone: Which Quarter, according to his naturall qualitie, is cold and dry; the Sunne being in Libra, it is more dry then cold: and the Sunne in Scorpio, it is equally cold and dry: and in the latter end the Sunne in Sagittarius, it is more cold then dry. And in the Autumne as in Spring, there are many boisterous winds often stirring. The diseases of this Quarter, are dangerous Fevers, Crampes, Tooth-aches, paine of the Heart, Rheumes, and Hoarsenesse, and Coughes. This Quarter (in my opinion) will prove hotte in the beginning, and in the middle extreame winde, and the end hard frostes.

**A Table to know the beginning and ending
of the Tearmes, and their Returnes or
dayes of Appearance this yeare 1611.**

Hilary Terme beginneth the xxiij. of January, being Wed-
nesday, and endeth the viij. of February: and hath these his Returnes.

Octabis Hilary, January xx.
Quind. Hilary, January xxvij.
Crast. p. n. s. c. February iij.
Octabis Pasche, February ix.

Easter Terme beginneth the xxiij. day after Easter, and endeth
the Monday next after the second day: and hath v. Returnes.

Quind. Pasche, April xiiij.
Tres Pasche, April xv.
Alcatis Pasche, April xviij.

Crast. Ascension, May iij.

Trinitie Terme beginneth the Friday next after Trinitie
Sunday, and endeth the Wednesday fournight after: and hath
iij. Returnes.

Crastin. T. n. itatis, May xv.
Octabis Trinitatis, May xxvij.
Quind Trinitatis, June iii.
Tres Trinitatis, June x.

Michaelmas Terme beginneth the ix. of October, and endeth
the xxvij. of November: and hath viij. Returnes.

Octabis Michael, October vi.
Quind Michael, October xij.
Tres Michael, October xv.
Mente Michael, October xxvij.
Crastino Annuntian, November iij.
Crastino Martini, November xij.
Octabis Martini, November xix.
Quind Martini, November xxvij.

Here followeth the dayly disposition of the
Weather, every day throughout the yeare,
according to the influence of the Planets and
fixed Starres, with the change, full, and quar-
ters of the Moone, and the rising and setting
of the sunne every tenth day, throughout
the yeare: and also certaine Veiles
applied to every month.

Of Ianuarie.

*Vino et Foco gaudet, canes torret,
Sanguinem minuere prohibet, armen claudit et aperit.*

Day	Sunne riseth.	Day	Sunne setteth.
1	hou. 8. r in. 4	1	hou. 3. n in. 55.
10	hou. 7. n in. 51.	10	hou. 4. n in. 8.
20	hou. 7. n in. 32.	20	hou. 4. n in. 28.

The first, ii and iii. dayes faire cleere weather.

First Moone the iiii. day, at one a clocke and 40. minutes in the morning. The v. vi. vii. dayes, windy and shewey. The viii. ex-
treme cold. The ix. x. and xi. dayes, raine of p. or east.

First Quarter the xii. day, at e. a clocke & 20 min. at night. The xiii.
raie. The xiiii. xix. frost of snow. The xvi. and xvii. windes
and shewey.

Full Moone the xviii. day, at one of the clocke & 15. min. after noone.
The xix. xx. and xxi. frostes. The xxii. and xxiii. warme wea-
ther. The xxiiii. day faire weather.

Last Quarter the xxv. day, at vii. a clocke and 37. min. in the after
noone: the weather all the rest of this Month, like to be windy,
with frost of snow.

Of

A Prognostication.

Of Februarie.

*Mare gelu constringit, sanguinem minuire concedit,
Venerem excitat, signa secat, agros stercozizat.*

Day.	Sunne ryleth.	Day.	Sunne setteth.
1	hou. 7. min. 15.	1	hou. 4. min. 45.
10	hou. 7. min. 00.	10	hou. 5. min. 00.
20	hou. 6. min. 39.	20	hou. 5. min. 21.

The first day sayre weather.

New Moone the ii. day, at viii. of the clocke and 11. min. at night:

The iii. and iiii. faire weather. The v. vi. and vii. snow or fleete.

The viii. and ix. small windes.

First Quarter the x. day at viii. of the clocke and 40 min in the morning. The xi. xii. xiii. and xiiii. some cold raines. The xv. and xvi. great stoze of raine.

Full Moone the xvi. day 11. min. past midnight. The xvii. xviii. xix. and xx. tempestuous weather, with stormes of haile. xxi. xxii. and xxiii. some frostes.

Last Quarter the xxiiii. day, at x. a clocke and 42. min. in the fore-noone. The xxv. xxvi. xxvii. and xxviii. dayes very faire weather.

Of March.

*Vomere scindit agros, Navigijs et balneis gaudet:
Vites et arbores putat; noctes diebus adqueat.*

Day.	Sunne ryleth.	Day.	Sunne setteth.
1	hou. 6. min. 20.	1	hou. 3. min. 40.
10	hou. 6. min. 00.	10	hou. 6. min. 00.
20	hou. 5. min. 38.	20	hou. 6. min. 22.

The first and second dayes, raine. The iii. day faire weather.

New Moone the iiii. day, 13. min. past noone. The v. vi. vii. viii. and ix. faire weather, with some stormes of wind. The x. some showers.

First

Iohnson. 1611.

First Quarter the xi. day, at iiii. of the clocke and 8. min. in the after noone. The xii. xiii. and xiiii. tempestuous weather with stormes of raine. The xv. xvi. and xvii. somewhat cold and frostes.

Full Moone the xviii. day, 16. min. before noone. The xix. and xx. faire weather. The xxi and xxii. stormes of winde. The xxiii. xxiiii. and xxv. dayes, faire cleare weather.

Last Quarter the xxvi. day, at vi. a-clocke & 16. min. in the morning: the rest of this Month like to moone somewhat windy.

Of Aprill.

Frondibus arbores induit, telluremque aperit:

Purgare mandat, paschalia celebrat, verq; reportat.

Day.	Sunne ryleth.	Day.	Sunne setteth.
1.	hou. 5. min. 18.	1.	hou. 6. min. 42.
10.	hou. 3. min. 3.	10.	hou. 6. min. 57.
20.	hou. 4. min. 42.	20.	hou. 7. min. 18.

The first day pleasant weather. The second very warme.

New Moone the iii. day, at one of the clocke and 30. min. in the morning. The iiii. v. and vi. dayes, sayre weather. The vii. and viii. tempestuous weather.

First Quarter the ix. day at x. a clocke at night: This Quarter is like to moone very warme weather.

Full Moone the xvi. day, halfe an houre before one a clocke in the morning. This Quarter looks for Winds & showres of raine.

Last Quarter the xxv. day 20. min. before one a clocke in the morning. The xxvi. xxvii. and xxviii. sayre weather. The xxix. and xxx. like to thunder.

Of May.

Venando tempus consumit, Flores producit:

Ex his butyrum facit, cuncta animalia exhilarat.

Day.	Sunne ryleth.	Day.	Sunne setteth.
1.	hou. 4. min. 23.	1.	hou. 7. min. 37.
10.	hou. 4. min. 11.	10.	hou. 7. min. 49.
20.	hou. 3. min. 55.	20.	hou. 8. min. 5.

The

A Prognostication.

The first day cloudy or overcast.

New Moone the ii. day at high noone. This Quarter is like to prove hotte weather.

First Quarter the ix. day, at vi. a clocke and 7. min. in the morning, some stormes of wind. The x. xi. and xii. dayes, some pleasant showers of raine. The xiii. & xiiii. wind & raine. The xv. overcast.

Full Moone the xvi. day, at xvi. a clocke and 17. min. after noone. This Quarter lookes for some thunder & tempestuous weather, with great windes and showers of raine.

Last Quarter the xxiii. day, at vi. a clocke & 17. min. at night. The xxv. and xxvi. faire weather. The xxvii. and xxviii. extreme hot, The xxix. xxx. and last dayes, faire sunn like weather.

New Moone the last day, at viii. a clocke and 14. min. at night.

Of June.

*Bella gerit, Fenum metit, Oves tondet, mellificat:
Segetes spicis armat, Solstitium affert.*

Day.	Sunne seteth.	Day.	Sunne setteth.
1.	hou. 3. min. 49.	1.	hou. 8. min. 11.
10.	hou. 3. min. 46.	10.	hou. 8. min. 14.
20.	hou. 3. min. 42.	20.	hou. 8. min. 11.

The first day faire weather. The ii. iii. iiii. and v. dayes, some small raine. The vi. day faire weather.

First Quarter the vii. day, at v. a clocke & 25. min. in the fore noone. The vii. viii. and ix. overcast and cloudy, with small showers. The x. xi. and xii. very faire weather. The xiii. very hot.

Full Moone the xiv. day, at iiii. a clocke and 43. min. in the morning: and the xv. xvi. and xvii. dayes, windy, with some small showers. The xix. and xx. faire weather. The xxi. and xxii. hot.

Last Quarter the xxiii. day, at vi. a clocke and 20. min. in the morning. The xxiii. xxv. xxvi. and xxvii. dayes, unsteady weather. The xxviii. and xxix. dayes, some raine or haille.

New Moone the last day, at viii. a clocke and xvii. min. in the morning, the weather hot.

Johnson, 1611.

Of Iuly.

*Frigida lauat, frumenta secat, horrea r'is slipat:
Cervos et lepores captat, Caniculares adducit.*

Day.	Sunne riseth.	Day.	Sunne setteth.
1.	hou. 3. min. 54.	1.	hou. 8. min. 6.
10.	hou. 4. min. 4.	10.	hou. 7. min. 56.
20.	hou. 4. min. 20.	20.	hou. 7. min. 20.

The first, ii. iii. and liii. dayes, fayre weather. The v. windy.
First Quarter the vi. day, at vii. a clocke and 46. minutes at night.
The vii. viii. ix. and x. fayre weather. The xi. xii. and xiii. ex-
treme hot with tempest.
Full Moone the xiiii. day, at vii. a clocke and 53. min. at night. This
Quarter disposed to extreme heate, with thunder and lightning.
Last Quarter the xv. day, at vii. a clocke and 2. minutes at night.
The xvi. xviii. and xix. dayes, cloudy weather. The xx. and
xxi. xxiii. dayes, & h and s, thunder, lightning, and hagle,
or raime.
New Moone the xxiv. day, at v. a clocke and 40. min. in the fore-
noone. The rest of this Moneth, vniuersall weather.

Of August.

*Pyra dat, Poma maturat, messi et canicularibus finem
Imponit, cervos ad corium sollicitat.*

Day.	Sunne riseth.	Day.	Sunne setteth.
1.	hou. 4. min. 36.	1.	hou. 7. min. 24.
10.	hou. 4. min. 52.	10.	hou. 7. min. 8.
20.	hou. 5. min. 14.	20.	hou. 8. min. 46.

The first, ii. iii. and liii. dayes, very faire weather.
First Quarter the v. day, at vii. a clocke and 10 min. in the morning.
This Quarter windy and good weather.

Full

A Prognostication.

Full Moone the xiii. day 38. min. before noone. The xiiii. and xv. dayes, some small showers. The xvi. and xvii. some hayle or thunder. The xviii. and xix. sayes weather. The xx. winds & showers. Last Quarter the xxi. day, at iiii a clocke and 23. min. in the morning. This Quarter Sommerlike weather. New Moone the xxvii. day, at vi. a clocke and 44. min. at night, windy: The rest of this Month very hotte weather.

Of September.

Venus stercorizat, semen bumi iaculat, uvas colligit, aequinoctium et mustum facit.

Day.	Summe rpleth.	Day.	Summe setteth.
1.	hou. 5. min. 34.	1.	hou. 6. min. 26.
10.	hou. 5. min. 54.	10.	hou. 6. min. 6.
20.	hou. 6. min. 14.	20.	hou. 5. min. 46.

The first and second dayes, sayre weather.

First Quarter the iii. day, 3. minutes before midn'ght. The iiii. v. and vi. dayes, extreame windes. The vii. viii. and ix. cold raines. Ther. and xi. overcast.

Full Moone the xii. day, at two a clocke and 47. min. in the morning. The xiii. xiiii. and xv. dayes some raine. The xvi. and xvii. cold. The xviii. cloudy and overcast.

Last Quarter the xix. day 18. min. before noone. The xx. xxi. & xxii. dayes, sayre weather. The xxiii. and xxiiii. son & cold. The xxv. some wind.

New Moone the xxvi. day at iiii a clocke and 33. min. in the morning. The rest of this Quarter, sayre and hot, with some windes and drying weather.

Of October.

*Anibus et feris vescitur, myrtam vendit, aerem infrigidat:
Propterea pecudes ad stabula cogit, arbores fructibus et foliis spoliat.*

	10	hou. 8. min. 14.			10.	hou. 3. min. 46.	
	20.	hou. 8. min. 12.			20.	hou. 3. min. 48.	

The first day cold and wet.

First Quarter the ii. day at x. a clocke and 44. min. in the forenoone.

The iii. iii. v. and vi. dayes. stormie and tempestuous weather.

The vii. and viii. fayre weather.

Full Moone the ix. day, at vi. a clocke and 45. min. at night. This Quarter for the most part, seasonable fayre weather.

Last Quarter the xvi. day, at ix. a clocke & 49. min. in the forenoone:

And the xvii. xviii. and xix. dayes, fayre weather, with small still windes. The xx. and xxi. dayes, windy and cold. The xxii. and xxiii. dayes, fayre weather.

New Moone the xxiii. day, at one a clocke and 15. min. in the morning: And the xxv. and xxvi. dayes, faire weather. The xxvii. and xxviii. dayes, cold & windy. The xxix. xxx. & xxxi. reasonable faire.

There shall no Eclipse of the Sunne or Moone appeare or be visibly seene this yeare about our Hartz in: and therefore I purpose not to speake of those, which happen in other Climates, because they nothing at all pertaine to vs.

Heere

Heere followeth briefe and generall Rules,

meet for many men to know and practise:

and not vnecessary for no man to know.

How to find the Golden number for ever.

A Doe vnto the yeare of our Lord Iesus Christ current, one: because the Saviour of the world, was borne the first yeare of the Circle of the 19. yeares: which some deuide by 19 and the remanier is the Prime or Golden number: If nothing remaine, then 19. is the Prime or Golden number.

Example.

This yeare of our Lord 1611. I desire to find the Prime or Golden number, wherefore I adde one, and it is 1612. which I deuide by 19. and the remanier is the Prime or Golden number: which is 16. and the next yeare it is 17. and the yeare following 18. and next 19. And then begin at one, and so continue untill 19. to euer.

How to find the Circle of the Sunne for euer.

The Circle of the Sunne conueynes the space of 28. yeares by the course of the Sunne: and therefore it is called the Circle or Dyke of the Sunne: because in those 28. yeares, all varieties and concurrences which can happen by meanes of the Dominicall letter and Leape y: are: returne againe to their first beginnings or courses: and not because the Sunne in that space of time fulfilleth his course in the Zodiacke, which Circle of the Sunne thus is found: adde vnto the yeares Current from the Nativitie of Christ 9. because the Saviour of the world was borne in the 9. yeare of the Circle of the Sunne: which Summe, deuide by 28. and the remanier is the Circle of the Sunne: If nothing remaine, take the Summe of 28. for the Circle.

Example.

I would find the Circle of the Sunne for this yeare of our Lord 1611. wherefore I adde 9. and the Summe is 1620. which I diuide by 28. and the remanier is 24. which is the Circle of the Sunne for this yeare: and so adding one for eue y yeare, untill you come to 28. And then you must begin againe at one, vnto 28. to euer.

¶

A Prognostication.

A Table to finde the Dominicall letter, for euer.

The Circle of the Sunne.	Beginning.	The Dominicall letter is.	The Dominicall letter for the leape ye are.
	1	G	F
	2	E	
	3	D	
	4	C	
	5	B	A
	6	G	
	7	F	
	8	E	
	9	D	C
	10	B	
	11	A	
	12	G	
	13	F	E
	14	D	
	15	C	
	16	B	
	17	A	G
	18	F	
	19	E	
	20	D	
	21	C	B
	22	A	
	23	G	
	24	F	
	25	E	D
	26	C	
	27	B	
	28	A	

THE vse of this Table is thus; The Circle of the Sunne found by the last verse, search it in the Table, and straight on a right Line is the Dominicall letter. If it be Leape yeare, you shall find two Letters: the latter on the right hand, to serue from the Sunday after S. Mathias day, for all the yeare following.

Example.

This yeare of our Lord God 1611. the Circle of the Sunne found by the last verse, is 24. which I seek in the Table, and right against it on the right hand, I finde F. to be Dominicall letter alone: wherof I find it is not Leape yeare.

How to find the Romaine Indiction for euer.

THE Circle Indictionall, containes 15. yeares of the Sunne: The vse whereof is chiefly among the Romans, for to find out the time of the Tribute due to be payde; which Indiction is yet in vs to them in all their writings, Letters, Billes, and Bonds, as we use to date the yeare of our Lord in our writings. Which Circle Indictionall, is thus

Johnson. 1611.

thus found: Adde unto the yeare of our Lord current 3. for our Saviour was borne in the third yeare Indictionall: whi h some de-
note by 15. and the remainer is the Indiction: if nothing remaine, 15.
is the Indiction.

Example.

I would finde the Indiction for this yeare 1611. wherefore I
adde 3. and the summe is 1614. which I divide by 15. and the re-
mainer is 9. wherefore 9. is the Indiction for this yeare and the next
10. and so forth to 15. and then begine againe at one, and so pro-
ceede to 15. for ever.

How to finde the Epact for ever.

The Epact, are the dayes, which the common yeare of the Summe
being 365. dayes, exceeds: the common yeare of the Moone be-
ing 354. dayes: which Epact is thus found out. Multiply the Gol-
den number of the yeare propounded by 11. and divide the product
by 30. and the remainer is the Epact.

Example.

This yeare 1611. the Golden number is 16. which I multiply
by 11. and the summe is 176. which being divided by 30 the re-
mainer is 26. the Epact for this yeare, and so by adding of 11. the
summe is 37. wherefore casting away 30. the remainer is 7. the
Epact for the next yeare: and so by adding 11. you shall finde the
Epact for ever. For the Romaine account. subtract 10. and you
shall finde the Epact to be 16. and so alwayes.

To find the age of the Moone by the Epact.

The Epact being found, adde unto the Epact, the Monthes from
March, and the dayes of the Month that you would know the
Age of the Moone, and if it cometh to above 30. cast away 30. and
the remainer is the Age.

Example.

This yeare, I would know the Age of the Moone the 5. of Sep-
tember: the Epact is 26. and the Monthes from March are 7. and
the dayes of September 5. the summe is all 38. so casting away 30.
I finde the Moone 8. dayes old.

A Table to finde the Feast of Easter for euery.

The daues of the Month.	The Domi- nicall letter.	The Goldē number.
Easter day.	21 C	16.
	22 D	5.
	23 E	
In March.	24 F	13.
	25 G	2.
	26 A	
	27 B	10.
	28 C	18.
	29 D	7.
	30 E	
	31 F	
Easter day	1 G	15.
	2 A	4.
	3 B	
	4 C	12.
	5 D	1.
	6 E	
	7 F	9.
In Aprill.	8 G	
	9 A	17.
	10 B	6.
	11 C	
	12 D	14.
	13 E	3.
	14 F	
	15 G	11.
	16 A	
	17 B	19.
	18 C	8.
	19 D	
	20 E	
	21 F	
	22 G	
	23 A	
	24 B	
	25 C	

The vse of this
Table.

SEEke the Golden
Number in the
right side of the Ta-
ble, and then looke on
the left side downe
ward below the Do-
minicall letter of the
yeare: if it be Leape
yeare, then weake be-
low the latter Letter, and
right againt the Do-
minicall letter for the
yeare, you shall see the
day of the Moneth
that Easter day falls
on.

Example.

This yeare of our
Lord God 1611 the
Golden number is 16.
and the Dominicall
letter is F Which 16.
I March in the right
side of the Table, and
the Dominicall letter
next downe wards, I
finde to be the 24. day
of March, which is
Easter day.

How

Johnson. 1611.

How to finde all the rest of the moueable
Feastes, Easter day being found, for euer.

Example.

Having found the Feast of Easter, by the Table afore, number backward six weekes, and thou shalt come to Quadragesima, or the first Lent Sunday; and the next Sunday, reckoning backward, is Shrove-lunday: from Shrove-lunday, reckon backward two weekes, and you shall finde Septuagesima: From Septuagesima, number the dayes untill the first of Ianuarie, vnto which number of dayes put alwayes thre weekes, & the number is the interuallum, or space of weekes and dayes betwene Christmas and Shrovetide. Again, from Easter day, reckon forwardes six weekes, and you shall come to Rogation Sunday, and the next Thursday following, is Ascension day: From Rogation Sunday, reckon two weekes forward, and you shall haue Trinity Sunday: the Thursday seauen night following, is Corpus Christi day. Ascension Sunday is the nearest Sunday to S Andrew the Apostles day, either before or after. If S. Andrewes day be on the Sunday, then it is Ascension Sunday.

The Feast day of S Mathew the Apostle in the Common year, is the 24. of February: and in the Leap year, it is the 25. of February, and so for euer.

To know how long the Moone shineth.

Make how many dayes the Moone is from her Change to her Full & so many times 48. minures she lisse hath in the Summer. And from her Full vnto her change, she riseth for every day 48. min. after the Summer solsticity.

A

A Prognostication.

A Table of the Moones rising and setting.

Age of the Moone increasing.	Howers	Minuts.	Age of the Moone decreasing.
1	0	48	29
2	1	36	28
3	2	24	27
4	3	12	26
5	4	00	25
6	4	48	24
7	5	36	23
8	6	24	22
9	7	12	21
10	8	0	20
11	8	48	19
12	9	36	18
13	10	24	17
14	11	12	16
15	12	0	

Example.

This year of our Lord
1611. the 10 day of
May, I finde the Moone
to be 8. dayes old: I en-
ter this Table, and a-
gainst 8. dayes, the age
of the Moone, I finde
Howers 6. Minuts 24.
which is the time she set-
teth after the Sunne: and
the time she shineth at that
age.

The 13. of November,
the Moone is 18. dayes
old, with which I enter
the Table. and against
that age, I find Howers
9. Minuts 36. the time
she shineth,
